Detailed Action

Response to Amendment

- 1. This action is responsive to communications: Amendment filed on 02/02/2007
- 2. Claims 1, 13, 16 have been amended. Claims 2 and 22-23 have been cancelled.

Claim Rejections - 35 USC § 102

- 3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:
- A person shall be entitled to a patent unless –
- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 4. Claims 1, 3-21 and 24 are rejected under 35 U.S.C. 102(b) as being anticipated by Boe et al. (Patent No. U.S. 6,236,975).

For claim 1, Boe teaches "a data management system for identifying patterns in data, the system comprising a host computer having an analysis engine for analysing relationships between responses made by a user to questions relating to a service or products (Col. 1, lines 58-67, Col. 4, lines 25-60), in which the analysis engine analyses

Art Unit: 2168

responses made by a user to one or more constructs using a process of fuzzy entailment" (Col. 2, lines 60-Col. 3, lines 42).

For claim 3, Boe teaches "each construct includes two distinct descriptive terms relating to things provided to users by operators of the system" (Col.12, lines 62-Col. 13, lines19)

For claim 4, Boe teaches "descriptive terms of each construct represent contrasting opinions of the thing" (Col.12, lines 62-Col. 13, lines 19, Col. 16, lines 24-43)

For claim 5, Boe teaches "which obtains data from a user that represents a user's opinion of the thing in a range defined by the descriptive terms" (Col. 5, lines 1-9)

For claim 6, Boe teaches "in which there is defined a number of discrete selectable steps within the range, that number being referred to as a mesh" (Col. 10, lines 34-50)

For claim 7, Boe teaches "in which the mesh is adjusted in reaction to inputs made by users" (Col. 10, lines 34-50, Col. 11, lines 30-52)

For claim 8, Boe teaches "in which the mesh is iteratively reduced until a minimum mesh value that yields a meaningful result is identified" (Col. 10, lines 34-66)

Art Unit: 2168

For claim 9, Boe teaches "in which the construct is represented by visual control displayed in a graphical user interface on a computer screen" (Col. 10, lines 34-67)

For claim 10, Boe teaches "in which the user can input a value representative of their opinion by adjustment of the position of the control" (Col. 10, lines 34-50)

For claim 11, Boe teaches "in which the results of the analysis are used to deduce which items of information will be of interest to a particular user" (Col. 6, lines 29-67)

For claim 12, Boe teaches "in which the system executes on a server that communicates with a user over a network link" (Col. 8, lines 32-53)

For claim 13, Boe teaches "a user data input component that executes on a remote host system" (Col. 4, lines 1-30)

For claim 14, Boe teaches "in which the data input component is represented in the display generated by a web browser" (Col. 10, lines 9-67)

For claim 15, Boe teaches "in which the data input component is generated by an applet that is downloaded to the remote host from the server" (Col. 3, lines 44-Col. 4, lines 24)

For claim 16, Boe teaches "in which the data is obtained through use of a repertory

Art Unit: 2168

grid"(Col. 3, lines 15-22, Col. 4, lines 39-60)

For claim 17, Boe teaches "in which incomplete data is processed by matching those parts of the data that are present with characteristics of existing data" (Col. 13, lines 1-58)

For claim 18, Boe teaches "in which the incomplete data is subject to discriminant analysis" (Col. 13, lines 1-58)

For claim 19, Boe teaches "in which data is subject to a process of linearisation prior to its being analysed" (Col. 5, lines 4-30)

For claim 20, Boe teaches "in which the process of linearisation includes conversion of non-numeric data to a numeric form" (Col. 3, lines 15-22)

For claim 21, Boe teaches "in which users are the customers of a business and the output includes predictive information as to the future purchasing behaviour of the customers" (Col. 12, lines 62-67, Col. 13, lines 1-19)

For claim 24, Boe teaches "a network server system operative to serve web pages to remote clients comprising a web server for generating HTML code to be rendered on a remote browser and an analysis server that implements a data management system

according to claim 1, the data management system deriving input data from analysis of a user's interaction with one or more rendered web pages" (Col. 4, lines 25-60)

Page 6

Response to Argument

5. Applicant's argument filed January 02, 2007 has been fully considered but they are not persuasive. The examiner respectfully traverses applicant's arguments. As per claim 1, applicant argued that Boe's teachings does not permit a user to enter one or more constructs. However, applicants did not claim permitting a user to enter one or more constructs anywhere in the claim limitation. Claim 1, indicated "analysis engine analyses responses made by a user to one or more constructs". However, Boe's teaches this limitation at Col. 1, lines 58-67, Col. 4, lines 25-60, wherein the users response is analyzed based on a survey for products and services. Applicants also argued that Boe does not teach using a process of fuzzy entailment. On the contrary at Col. 2, lines 60-Col. 3, lines 42 Boe's teachings customers feedback to survey questions are analyzed and ranked based on both their feedback and other customers feedback, However, the survey system enables the customer to know where they stand relative to other customers demographics and survey response in other to present product and service information to the customers (Col. 4, lines 39-51). Thus teachings are synonymous to applicant's teachings of Fuzzy entailment; which allows ordinal ranking and splits users based on those receiving strong or weak recommendations.

Art Unit: 2168

Page 7

As per claim 3 and 4, applicant argued that Boe does not teach "each construct includes two distinct descriptive terms relating to things provided to users by operators of the system" and "descriptive terms of each construct represent contrasting opinions of the thing". On the contrary at Col.12, lines 62-Col. 13, lines19, Col. 16, lines 24-43 Boe teaches a customer completes a survey, however, the survey has different conditions including the "What-if" condition which is the opposite of the "IF" condition (which are both descriptive terms). Therefore the customer completes the survey based on conditions. During a survey if a customer responds to questions on rent (IF condition), questions on mortgage will not be presented. However, the "What-if" condition allows the customer to see what would have been presented in the feedback page if the customer took the survey/ answered questions regarding a mortgage, the "What-if" page also allows the customer to make changes by making a different selecting. Thus 35 U.S.C 102 rejection is maintained.

Art Unit: 2168

CONCLUSION

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to OLUBUSOLA ONI whose telephone number is 571-272-2738. The examiner can normally be reached on 10.00-6.30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, TIM VO can be reached on 571-272-3642. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
